Subject: FY 2000 State and Federal Related Funding Tables

Attached are summary tables identifying programs and funding that relate to the CALFED program. These are the tables that Lester is providing at the Doolittle hearing on the 20th, and which I am sharing with the CALFED agencies and the other agencies referenced in the table.

The tables are draft and still need work, but I wanted you to see what has been distributed. We have more information to back up the numbers but could not include it all. If you can give the table a quick look and see if there are glaring errors or omissions--I'd appreciate it.

At this point--there are no plans to include this information in the June draft-- but things always can change.
